Negin Alipanahi

Frontend Web Developer

Toronto, Canada

negin.alipanahi@gmail.com | (416) 881 1221 | LinkedIn | Website

PROFILE SUMMARY

- Three years of professional experience in **Frontend technologies** with keen focus on **React.js**, in a dynamic web production environment.
- Over three years of **project management** experience within the **IT industry**.
- Strong academic backgrounding in **Industrial engineering**, ensuring **analytical thinking, problem-solving,** and **time management** skills with exceptional attention to **details**.
- In-depth understanding of computer science fundamentals such as **object-oriented design**, **data structures**, and **algorithm design.**
- Comprehensive insight into the web development process, from **design** to **deployment**.
- Adept at **Agile frameworks** such as **Scrum**, including participating in daily stand-ups, sprint planning, and retrospective meetings to ensure collaborative development processes.
- Excellent written and verbal **communication skills**, both **technical** and **non-technical**.
- **Self-motivated** team player with a proven ability to work both independently and collaboratively.

PROFESSIONAL EXPERIENCE

Frontend Web Developer

PELAK, Tehran, Iran - *May 2021 - May 2024*

- Engineered and deployed highly customizable, reusable, and dynamic frontend components with **React.js** and **TypeScript**, significantly improving development efficiency and application performance.
- Boosted page speed by 15% through the strategic **optimization** of **RESTful API calls**, enhancing user experience and site performance.
- Achieved a 20% surge in mobile traffic by implementing cutting-edge **responsive designs**, ensuring optimal user engagement across all devices.
- Coordinated with **cross-functional teams** to consistently achieve and surpass project milestones and deadlines, ensuring timely and successful project completion.

Frontend Web Developer Intern

PELAK, Tehran, Iran - *Mar 2021 - May 2021*

- Assisted the development team in **developing** and **debugging** the web application.
- Gained experience working with **RESTful APIs** and asynchronous request handling.
- Collaborated closely with **graphic designers** and engineers to implement web and software design features that align with client needs and project goals.
- Collaborated closely with **UI/UX** designers to ensure pixel-perfect translation of **Figma designs** into clean, high-quality codes.
- Implemented **accessibility standards** such as WCAG 2.0 to ensure maximum user experience.

Assistant IT Project Manager

Golandishe IT-company, Tehran, Iran - *Aug 2014 - Mar 2018*

- Analyzed business and operational processes, preparing detailed **process charts** and **work breakdown structures** to enhance efficiency.
- Assisted in developing detailed project plans, timelines, and resource allocation, ensuring project objectives were met on time and within budget.
- Created and submitted comprehensive project progress reports using **MS Project** to ensure timely and accurate communication with project managers.
- Facilitated effective communication between stakeholders, team members, and clients, ensuring all parties were informed of project progress, changes, and issues.

EDUCATION

M.Sc. Industrial Engineering - System Management and Productivity
Islamic Azad University, North Tehran Branch (IAU-TNB)

B.Sc. Industrial Engineering - Planning and System Analysis
Islamic Azad University, North Tehran Branch (IAU-TNB)

SKILLS

- HTML5 / CSS3
- JavaScript / ES6
- TypeScript
- Node.js
- React.js
- React Query
- Redux
- Express.JS
- MongoDB
- MERN Stack
- RESTful services / APIs
- jQuery
- Bootstrap
- Responsive Design
- Tailwind CSS
- Sass / Less
- Git / Version Control
- GitHub
